Features

- **Vehicle Maintenance :**

  Tracking System provides fleet/vehicle owners with a state of art reminder of scheduled vehicle maintenance events.

- **Remote Digital Data Management :**

  Tracking System helps you send and receive various digital data to and from your Vehicle, which includes status of ignition air-condition, door status, head light or any other digital data.

- **Fuel Monitoring :**

  Tracking Genie helps manage and record fuel level of vehicle, which in turn helps our clients to control expense on fuel/gas.

Reporting

Tracking System comes with an easy to use set of reports

Work hours	Engine idle times	Geo Fence	Speed	Mileage

When these thresholds are broken by anyone an alert is sent in real time and the reports are stored. Our reporting is a flexible enough to run whenever needed or scheduled to run automatically with the results emailed to any number of recipients on a daily or weekly basis.
